

Triangular Wave Technologies BIOCLEAN Deposit Control System

Control Scale and Bio-fouling in all water-fed appliances

How the Triangular Wave Systems Control Scale, Lime and Biological Deposits.

Scale and biological deposits form when these elements "stick" to the surfaces of pipes, water heaters, plumbing fixtures and other equipment. The Triangular Wave Deposit Controller charges the particles in the water so that they can not stick together or stick to any surfaces.

Simply Said...

The Triangular Wave Technologies Water Conditioner will give you the total effect of soft water without the negative effects, and clear up the deposits you already have!

Breakthrough Technology Means...

- Provides the effects of softened water, neutralizes calcium hardness effects in the water
- Reduce onsite service calls
- Prevents scale & slime buildup on surfaces
- Uses no salts or other chemicals
- Service and MAINTENANCE FREE!
- Improves efficiency of all water-fed appliances and extends their lives
- Quickly pays for itself and continues saving
- Descales the entire system over time
- Designed for safety: The output is safe to both personnel and equipment. There is NO ELECTRICAL CONTACT WITH THE PIPE

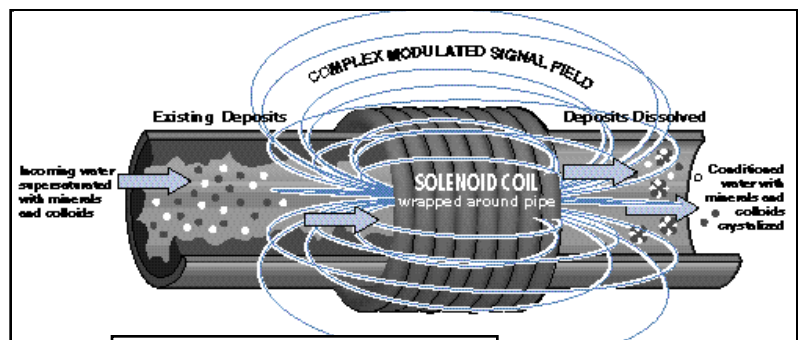

All the benefits of SOFT WATER WITHOUT THE SALT!

- Reaction chamber compatible with all types of pipe/tube
- Requires no plumbing work, and can be installed by anyone
- Takes up minimal space and plugs into a standard 120 vac socket
- 90 DAY MONEY BACK GUARANTEE
- 5 YEAR WARRANTY
- Uses only \$10.00 to \$14.00 of electricity per year
- STOPS LIME SCALE BUILD UP

**PREVENTS SCALE BUILD-UP
CONTROLS SLIME DEPOSITS
REDUCES CORROSION
CONTROLS ALGAE AND BACTERIA
MAINTAIN EFFICIENT HEAT TRANSFER
EXTENDS LIFE OF HEATING ELEMENT**

The Patented Triangular Wave System

The Triangular Wave System is an advanced method for controlling scale and bio-fouling. The Triangular Wave System is a wire coil that forms a solenoid around the fluid pipe. The solenoid is energized by a power supply that constantly changes the polarity, frequency and amplitude of the current being sent to the solenoid. When the current reaches the solenoid, a constantly changing electromagnetic field is formed. That field induces a constantly changing voltage that treats the particles in the water.

For Water-Fed Appliances
Washing Machines
Humidifiers
Hot Water Heaters
Soup Vending Machines
Coffee Machines
& Many More

For pipes 3/8" or less
Larger sizes available upon request
